This unit houses up to 11 single pole ten throw (SP10T) switches configured (in its maximum capacity) as a 1X100 Multiplexer in a $4 U$ (7 inch) high full rack enclosure. Back panel mounted switches reduce the number of internal RF/Microwave cables and eliminate output cables. The switching system is offered with a reduced number of switches starting from 1X10.

## Benefits/Tradeoffs

- Available operating frequencies: DC-18 GHz
- Electromechanical switches offer at least 1 million life cycles
- Perfect for both low and high power applications
- Longer switching time
- For larger scaled multiplexing the chassis size quickly increases
- 1 by n ( $1 \times 10,1 \times 20, \ldots, 1 \times 100$ )
- Multiplexer
